

Major food companies from Pepsi to General Mills are already labeling their products to comply with this new law. But this new Senate bill would undo all of this marketplace momentum by:

- Blocking all state labeling laws
- Replacing straightforward labels with QR codes or 1-800 numbers
- Stalling labeling by **two years** while the USDA figures out labeling requirements

This bill is nothing but a gift to Monsanto and Big Food, weakening consumer protections and deliberately keeping us in the dark about what the industry is putting in our food.

Call your Senators now: [1-855-977-1770](tel:1-855-977-1770) and tell them you want easy-to-read GMO labels on food packages. [Once you call, fill out our quick survey to let us know how it went.](#)

We've been fighting for GMO labels together for years - and we've been winning. Please contact your Senators to make sure the battle isn't lost at the last minute.

On behalf of my family, and millions of American families who will be able to make smart and informed choices about what we put in our bodies: thank you, deeply, for all that you have done.

Sincerely,
Jean Halloran, Consumers Union
Policy and Action from Consumer Reports
